

RxTOOLKIT eLEARNING™ enables you to operationalize best practices — utilizing trusted information, providing practical application, and integrating competency directly into the workplace.

Maintaining staff competency and keeping them up-to-date with the complexities of the job, operational procedures, regulatory requirements, and constant changes to medication information presents a challenge to any manager.

RxTOOLKIT eLEARNING™ provides the resources you need to train your staff, enables you to track and manage their competency requirements, and helps you to make continuing education a part of the everyday practice setting.

Summary of Benefits:

- Professionally curated and continuously updated
- Online, mobile friendly, accessible from anywhere, always available, and easy to use
- Peer-reviewed content developed by multi-disciplinary professional team
- Clinical skill-set and drug specific training provides:
 - » Increased safety and efficiency
 - » Boost to employee confidence
 - » Improved patient outcomes and satisfaction

SKILL DEVELOPMENT COURSES

Courses for clinical and operational growth

RxTOOLKIT eLEARNING™ has developed **skill specific development courses** that include directly applicable clinical skill sets.

These courses help prepare clinicians for the clinical setting and include common proficiency requirements involved in the preparation and administration of biologicals and other infusion drugs. These courses are appropriate for all clinicians including pharmacy technicians, pharmacists, and nursing staff. New courses are being added all the time. Check out rxtoolkitlearning.com/shop for the latest.

Our mission...

to provide specialized online training with both clinical and operational focus to increase safety, expand competency, boost confidence, and ensure successful patient outcomes.

RxTOOLKIT®

DRUG SPECIFIC COMPETENCY TRACKING™

An ongoing program for drug specific training, certification, and tracking

This ongoing educational program provides drug specific **courses, certification, and tracking** with interactive assignments and competency exams based on drug information provided by the FDA drug package insert.

The courses are fully automated:

1. Completion certificates are awarded as employees complete course requirements
2. Certification expires at intervals chosen by you (6-months, 1-year, etc.)
3. Employees receive notification and return to the course when it's time to retrain

Choose which drug courses you require, and then assign them to individual staff members or groups. Employee activity and performance are fully tracked and monitored enabling you to easily track staff progress throughout the chosen term.

Summary of Benefits:

- Easily verify a clinician's competency with ANY specific drug
- Provide high-quality educational resources and structure for your training
- Fully customizable parameters provide specific course control
- Retrain at intervals chosen by you (6-months, 1-year, etc.)
- Full automation for assignment completion, grades, and certificate awards
- Reports and activity tracking for employee assessment

CUSTOM TRAINING/TRACKING PROGRAM

Build your own staff training, tracking, and/or certification program

Staff competency training and/or tracking is not always a one-size-fits-all solution! We'll work with you to **develop training and/or tracking programs** to suit your needs. Our powerful LMS (learning management system) platform has literally been built for fine-tuning.

Whether you require a simple course to track your staff's ongoing CE certifications or are looking for a way to monitor which staff members have reviewed certain company policies and procedures, we can help.

You can even build your own certification and tracking course with interactive assignments and competency exams based on information you provide.

Summary of Benefits:

- Provide your own educational resources and structure for your training
- Customize individual topics, assignments, and exams to fit your needs
- Various options for managing course flow, reminders, and benchmarks
- Retrain at intervals chosen by you (6-months, 1-year, etc.)
- Full automation for assignment completion, grades, and certificate awards
- Reports and activity tracking for employee assessment
