

Our web-based software applications work to...
*reduce medication errors, enhance clinical competencies,
increase patient safety, and improve clinical outcomes.*

Rx Workflow

A library of **over 200** user-friendly, pharmacist-approved medication guides for clinicians including infusion nurses, pharmacists, and pharmacy technicians. Our pharmacist-curated monographs have instructions for preparation and administration and product specific calculators that provide drug-specific infusion rates and taper charts. Medications in our library primarily include infusion medications and vaccines. Libraries are customizable and contain patient education tools.

Chronic Care Infusion Medication Library

Antibiotic Infusion Library

Vaccine Library

Rx ELearning

Training and assessments for clinical teams to enhance medication-specific competency which includes certification tracking. Clinical managers and supervisors benefit from robust competency verification reporting.

RxE Learning courses help prepare clinicians for the clinical setting and include common proficiency requirements involved in the preparation and administration of biologics and other infusion drugs. These courses are appropriate for all clinicians including pharmacy technicians, pharmacists, and nursing teams.
